List of Figures

1.1 Example of a simple homogeneous thematic progression 22
1.2 Example of a heterogeneous thematic progression 22
1.3 A four-node part of a broken heterogeneous thematic progression 23
1.4 A two-node part of a broken heterogeneous thematic progression 23

2.1 Structural representation of simple linear thematic progression . 32
2.2 An example of simple linear thematic progression 33
2.3 Structural representation of thematic progression with continuous (constant) theme 34
2.4 An example of thematic progression with continuous (constant) theme 34
2.5 Structural representation of thematic progression with derived themes 35
2.6 An example of thematic progression with derived themes 35

3.1 Pattern used to number clausal communicative fields in the corpus 51
3.2 Example of FSP tags attached to a sentence element 52

4.1 Information contour of text (news article) 60
4.2 Information contour of text (academic article) 61
4.3 Information contour of text (academic article, B-spline version) . 62
4.4 Information contour of text (news article, B-spline version) . . . 62
4.5 The pattern of a typical communicative field in both articles . . 64
4.6 Overall occurrence of communicative units (news article) 67
4.7 Overall occurrence of communicative units (academic article) . . 68
4.8 Surface vs deep distributions of CD 69
4.9 Most frequent patterns of surface distribution of CD (news article) 72
4.10 Most frequent patterns of surface distribution of CD (academic article) 73
4.11 Most frequent patterns of deep distribution of CD (news article) 74
4.12 Most frequent patterns of deep distribution of CD (academic article) 74
4.13 Correct and violated T–R sequences (both articles) 77
4.14 Dynamic semantic scales (news article) 78

4.15 Dynamic semantic scales (academic article) 79
4.16 Broad scene dynamics (news article) 82
4.17 Broad scene dynamics (academic article) 83
4.18 Narrow scene dynamics (news article) 85
4.19 Narrow scene dynamics (academic article) 86
4.20 Narrow scene dynamics with tx and Tx sections (news article) . 88
4.21 Narrow scene dynamics with tx and Tx sections (academic article) 89
4.22 Thematic progression in paragraph 37 (news article) 91
4.23 A progression running through paragraphs 36 and 37 (news article) 91
4.24 Average number of thematic progressions per paragraph 92
4.25 TP types per paragraph (news article) 93
4.26 TP types per paragraph (academic article) 93
4.27 Simple TP and TP with continuous theme (academic article) . . 95
4.28 Occurrence rates of the three basic TP types (news article) . . . 96
4.29 Thematic progression with a continuous theme (news article) . . 96
4.30 Simple linear thematic progression (news article) 97
4.31 Thematic progression with a derived theme (news article) 97
4.32 Occurrence rates of the three basic TP types (academic article) . 98
4.33 Thematic progression with a continuous theme (academic article) 99
4.34 Simple linear thematic progression (academic article) 99
4.35 Thematic progression with derived themes (academic article) . . 100
4.36 Development of a prospective hyperthematic unit (academic article) 100
