ANCIENT GREEK ΣΙΔΗ AS A BORROWING FROM A PRE-GREEK SUBSTRATUM

The correspondences between Ionic σίδη or σίβδη, Aeolic ξίμβᾶ, Doric (Cyrenaean) σιβδᾶ f. ‘pomegranate, Punica granatum L.’, Boeotian σίδᾶ f. ‘pomegranate (tree and fruit)’, also ‘a water plant, probably water-lily, Nymphaea alba L.’, Attic σιδη f. ‘water-lily’, are carefully discussed in the paper. It is concluded that the words demonstrate certain Pre-Greek features, which cannot be treated as native.

Keywords: Greek Botanical Terminology, Pre-Greek Substrate, Pomegranate

In our article we want to discuss the origin of Greek σίδη f. ‘pomegranate’ and to explain, if possible, its numerous alternative forms and derivatives.

In Greek literary tradition the word σίδη (or Σίδη) appears in four following contexts:

- A) as a name of the city;
- B) as a female personal name;
- C) as a word for pomegranate tree and its fruit;
- D) as a word for water plant, similar to pomegranate, attested twice in Theophrastus (*HP* IV 10.1), most likely the water lily (mentioned among plants of Orchomenus and Egypt). Interestingly, when Theophrastus refers to pomegranates, he consistently uses the synonymous term ρόᾶ.

In other words, all meanings of the name σίδη / Σίδη can be divided into three main groups: appellatives, toponyms and eponyms. As all *nomina propria* derive from appellatives, we intend to discuss firstly the Mycenaean evidence, later the attested Greek (or non-Greek) *nomina appellativa* and finally proper names.

1. Mycenaean evidence.

The personal name *si-da-jo* (KN Dl 947.B; X 7626), perhaps also registered as *]si-da-jo* (KN Nc 4490; KN Od 562.2), should be read as *Σιδαῖος, AURA JORRO (1993: 291). This Mycenaean anthroponym may be treated as an ethnic form derived from the place name Σίδη or Σίδαι, CHADWICK–BAUMBACH (1963: 244, 269), though RUIJGH (1967: 220) does not exclude a straightforward derivation from the Greek appellative σίδη f. ‘pomegranate’.

The Linear B evidence seems to suggest that the Mycenaeans called pomegranates *ro-a /rhoai/*, also *ro-i-ko /rhoiskoi/* in a diminutive form, FORTES FORTES (1984: 8); BARTONĚK (2003: 173, 356, 600). The synonymous term σίδᾶ f. ‘pomegranate’ is not attested in the Mycenaean Greek. The personal name *si-da-jo* is hardly a direct indication that the Mycenaean Greeks have known and used the synonymous term in question, though they must have known a Pre-Greek place name called Side or Sidai.

2. Synonymy in the pomegranate terminology: Greek literary evidence.

The problem of two synonymous terms for ‘pomegranate’ is presented by Agatharchides of Cnidus. He gives an anecdote, recounted by Athenaeus (Ath. XIV, 64), about Epaminondas and the Boeotian name σίδᾶ for the pomegranates, see MALINOWSKI (2007: 282–283).

σίδας δ' ὅτι τὰς ροιάς καλοῦσι Βοιωτοὶ Ἀγαθαρχίδης ἐν τῇ ἐννεακαιδεκάτῃ τῶν Εὐρωπιακῶν οὕτως γράφει: ‘ἀμφισβητούντων Ἀθηναίων πρὸς Βοιωτοὺς περὶ τῆς χώρας ἣν καλοῦσι Σίδας, Ἐπαμινώνδας δικαιολογύμενος ἔξαιρηνης ἐκ τῆς ἀριστερᾶς μεταλαβόν κεκρυμμένην ρόαν καὶ δεῖξας ἥρετο τί καλοῦσι τοῦτο. τῶν δ' εἰπόντων “ρόαν” “ἄλλ’ ἡμεῖς, εἴτε, σίδαν” ὁ δὲ τόπος τοῦτο ἔχει τὸ φυτὸν ἐν αὐτῷ πλειστον, ἀφ' οὗ τὴν ἐξ ἀρχῆς εἱληφε προσηγορίαν: καὶ ἐνίκησεν. Μένανδρος δ' ἐν Αὐτὸν Τιμωρουμένῳ ροίδια αὐτὰς ὠνόμασεν (...).

But Agatharchides, in the nineteenth book of his *History of Europe*, tells us that the Boeotians call pomegranates not ροιαί but σίδαι, speaking thus: – “As the Athenians were disputing with the Boeotians about a district which they called Sidae, Epaminondas, while engaged in upholding the claims of the Boeotians, suddenly lifted up in his left hand a pomegranate which he had concealed, and showed it to the Athenians, asking them what they called it, and when they said ροιά, ‘But we’, said he, ‘call it σίδαι’. And the district bears the pomegranate-tree in great abundance, from which it originally derived its name. And Epaminondas prevailed”. And Menander, in his *Heauton-Timorumenos*, called them ροίδια (...). Translated into English by YONGE (1854: 1041).

On the basis of Agatharchides' anecdote it seems obvious that two different names for 'pomegranate' was used in Boeotia and Attica. The observed synonymy was well known in the entire Hellenic world. Numerous equivalents of the Boeotian name are attested in the Ancient Greek lexicons and Greek dialects.

2.1. The homonymic water plant (Boeotian *σίδᾶ*, Attic *σίδη*).

In his discussion on pomegranate Athenaeus (Ath. XIV, 64) informs us that the name *σίδα* denotes also a water plant.

λέγεται δέ τι καὶ φυτὸν σίδην ὄμοιον ροῦῃ, γινόμενον ἐν τῇ περὶ Ὄρχομενὸν λίμνῃ ἐν αὐτῷ τῷ ὕδατι, οὗ τὰ μὲν φύλλα τὰ πρόβατα ἐσθίει, τὸν δὲ βλαστὸν αἱ ὕες, ὡς ἴστορεῖ Θεόφραστος ἐν τετάρτῳ περὶ φυτῶν, γίνεσθαι λέγων καὶ τῷ Νείλῳ ὁμώνυμόν τι αὐτῇ ἄνευ ρίζῶν.

There is, however, another plant called *sida*, which is something like the pomegranate, and which grows in the lake [near] Orchomenus, in the water itself; and the sheep eat its leaves, and the pigs feed on the young shoots, as Theophrastus tells us, in the fourth book of his treatise on Plants; where he says that there is another plant like it in the Nile, which grows without any roots.

Translated into English by YONGE (1854: 1041).

The plant from Orchomenus is identified with nenuphar (*Nymphaea alba* L.), and the one from the Nile with lotus (*Nymphaea lotus* L.). It is worth emphasizing that in his work *History of Plants* (IV 10.1–4) Theophrastus of Eresus, the well known scholar and writer, uses the term *σίδη* to denote exclusively the water lily, mentioned in the list of plants of the lake Copais. When he mentions pomegranates, he uses the word *ρόα*. Also Hesychios of Alexandria registers a water plant in Egypt called *σίδη*, referring to Theophrastus as an authority (cf. *σίδη* · Θεόφραστος φυτὸν ἔτερον τῆς ροῦας φησιν εἶναι τὴν *σίδην*, φύεσθαι δὲ ἐν τῷ Νείλῳ "side - Theophrastus says that a plant, different from the pomegranate, growing in the Nile").

3. Ancient Greek lexical evidence.

[A] Boeotian *σίδᾶ* f. 'pomegranate', also 'a water plant, probably water-lily, *Nymphaea alba* L.' (Ath. XIV 64); Attic *σίδη* f. 'water-lily' (Thphr., *HP* IV 10.1–4) seems a probable borrowing from Boeotian.

[B] Ionic *σίδη* f. 'a pomegranate tree and fruit', LIDDELL–SCOTT 1996: 1385–1386); see also *σίδαι* · *ρούαί* (Hsch., σ-590). The East Ionic term *σίδη* is reflected in the Modern Greek dialects of Pontus and Cappadocia (see

below, 2.5.1.). Athenaeus (Ath. XIV 64) says that the term σίδη denoting ‘pomegranate’ was unknown in Attica.

[C] Doric (Sicilian) σιδέα f. ‘a pomegranate tree’. The Doric form *σιδᾶ seems to be confirmed by loanwords attested in the South Italian dialects (see below, 2.5.2).

[D] dial. σίλβαι · ροιαί (Hsch., σ-634). Though the term σίλβᾶ (or σίλβῃ) f. ‘pomegranate’ is not quoted in preserved texts of the Ancient Greek literature, strong reflexes of it are attested in some dialects of Modern Greek (see below, 2.5.3.). Also the derivative form σίλβια · σίδια (Hsch., σ-635) ‘pomegranate peels’ should be taken into account.

[E] Doric (Cyrenaean) σίβδᾶ f. ‘pomegranate’ (Call., *Dian.* 28; FERNANDEZ-GALIANO 1980: 581); see also σίβδαι · ροιαί (Hsch., σ-567). Ionic (dial.) σίβδη is also attested.

[F] Aeolic ξίμβαι f. ‘(great) pomegranate’, CHANTRAINÉ (1974: 766): “obscure, p.-ê. mot d’emprunt”. The Aeolic appellative is attested twice in the Hesychian glossary: ξίμβαι · ροιαί. Αιολεῖς (Hsch., ξ-68); ρίμβαι · ροιαί μεγάλαι. ἄμεινον δὲ διὰ τοῦ Ξ ξίμβαι (Hsch., ρ-324).

[G] Greek dial. (perhaps Cretan?) ρίμβαι f. ‘great pomegranate’. It appears exclusively in the Hesychian glossary: ρίμβαι · ροιαί μεγάλαι. ἄμεινον δὲ διὰ τοῦ Ξ ξίμβαι (Hsch., ρ-324). The change of ξ- to ρ- is suggested by some scholars for a Cretan dialect¹. However, the evidence is far from being conclusive, as the only one example may be submitted, namely Cretan Greek ρύστόν · δόρυ. Κρῆτες (‘spear, pike, the shaft of a spear’) < Gk. Hom. ξύστόν ‘spear, lance’, orig. ‘the polished shaft of a spear’, BROWN (1985: 83).

[H] the term κυσήγη f. ‘pomegranate’ is attested in the Hesychian glossary with no ethnic designation, cf. κυσήγη · ροιά (Hsch., κ-4730). Its resemblance to the Albanian term *shegë* f. ‘pomegranate’ is so obvious that it cannot be treated as an incorrect gloss. It is unclear whether Hesychian κυσήγη was used by a Greek tribe or a non-Greek population. The most probable conclusion is that κυσήγη should be regarded as a straightforward ancestor of Alb. *shegë*.

Ancient Greek derivatives:

[a] σίδιον n. ‘pomegranate peel or grain’ (usually in pl. σίδια); σίδια · τὰ τῶν ροιῶν λέπυρα ‘peels of the pomegranate fruits’ (Hsch., σ-598); σιδίῳ · κόκκῳ ροῦς dat. sg. ‘grain of a pomegranate fruit’ (Hsch., σ-599).

¹ SCHMIDT (1861: 429) adds in his comment on ρίμβαι: “Cf. ξίμβαι. *Creticum est, vide ρύστόν*”. BROWN (1985: 83) rejects this interpretation on the basis of the following observations: firstly, “the Cretan ρύστόν is a derivative of ἐρύω”; secondly, “the development ξ- → ρ- is scarcely credible on phonological grounds”; thirdly, “there is no other independent evidence of such a change”. Finally BROWN (1985: 83) concludes that “there is nothing to connect either word with Crete”.

- [b] dial. σίβδια · σίδια (Hsch., σ-567);
- [c] dial. σίλβια · σίδια (Hsch., σ-635);
- [d] dial. ψιδιον n. ‘pomegranate peel’, Alex. Trall.; CHANTRAINE (1977: 1002).
- [e] dial. στίδιον · κόκκος ροιᾶς ‘grain of a pomegranate fruit’ (Hsch., σ-1855);
- [f] σίδειος adj. ‘of the pomegranate’; LIDDELL—SCOTT (1996: 1386).
- [g] σιδόεις, -εσσα adj. ‘of the pomegranate’.

Two Hesychian glosses [h] σίλβη · εῖδος πέμματος (ἐκ) κριθῆς, σησάμης καὶ μήκωνος ‘kind of cakes of barley, sesame and poppy’ (Hsch., σ-634) and [i] σίβληθρα · πόπανα τὰ περικεκνισμένα (Hsch., σ-569) should be separated from the Greek names for ‘pomegranate’. They have nothing to do with pomegranate fruits. According to NEUMANN (1961: 98), the two Hesychian glosses in question represent an Anatolian ingredient in the Ancient Greek vocabulary, cf. Hittite *šiliha* ‘kind of a cake’ with two scribal variants *šiliwa* and *šiliuwa* ‘id.’. BEEKES (2010: 1330) comments as follows: “If cognate, it is clearly a loanword or a Pre-Greek word. Yet the -β- of σίλβη is difficult to reconcile with the Hittite forms”. However, it is obvious that the Greek letter -β- renders the Anatolian phoneme **w* [u].

4. Modern Greek evidence.

To the best of our knowledge, some visible traces of the Ancient Greek terminology for ‘pomegranate’, discussed above, may be distinguished in the Modern Greek dialects.

4.1. Pontic *σίδη*, Cappadocian *σίτη* (in Sinasos), *το σίδι* (in Pharasa), Kerkyrian *το σίδι* ‘Weide, Weidenbaum’, ANDRIOTIS (1974: 492, No. 5347). The Pontic and Cappadocian appellatives seem to represent Ionic *σίδη* ‘pomegranate’.

4.2. There are numerous loanwords in the Italian dialects: Salentian *sida*, *sita*, *sèta*; Tarentian *sèta*; Old Barese *sede*, *seida*; Barese *sétə*, *saitə*, *sèitə* f. ‘melagrana’, Brindisian *setúddu* ‘fiore di melagrano’, SICCA (1924: 197); ROHLFS (1964: 454–455). All the Italian forms go back to Doric **σίδā* f. ‘pomegranate’.

4.3. Pontic *σίλβă* ‘eine Pflanze mit roten Früchten an der Blättern’, Samian *το σίλβι* ‘Pappel’, Rhodian (PN) οι Σίρβες, Chian (PN) η Σίρβα, ANDRIOTIS (1974: 492, No. 5351). The Greek scholar derives these appellatives and place-names from Ancient Greek *σίλβα* f. ‘pomegranate’.

5. Place and personal names.

The place names derived from the appellative σίδη f. ‘pomegranate’ are registered not only in the Continental Greece, but also in Asia Minor and islands. As early as in 1921 J. Huber listed a number of Pre-Greek toponyms derived from a substratal term for ‘pomegranate’:

„σίβδη, σίδη, *granatum, quo in Asia Minore, Graecia, Africa nascitur. Ex hac arbore Σίβδα urbs Cariae, Σίδη urbs Pamphyliae et Laconiae, Σιδήνη urbs Troadae, Σιδήλη urbs Ioniae appellatae sunt*”, HUBER (1921: 22).

The following toponyms are registered in the ancient sources²:

- 1) **Side (Sida)**, a city and port in Laconia; combined with Etis and Aphrodisia in one federation named Boias (Paus. III 22, 11).
- 2) **Side**, a place name in Lamia-Hypata (Phthia).
- 3) **Side**, a town in Pamphylia, on the coast between Melas and Erymedon (Stad. 214, 215; St.Byz., s.v. Σίδη), founded by the Cumaeans (Scyl. 101; Str. XIV 668; Arr., *An.* I 26);
- 4) **Side**, a town on the coast of Pontus (Str. XII, 3, 16), also named Polemonion (today *Fatsa* in province Ordu);
- 5) **Side** (ἡ Σίδη), a town in Troad, connected with Achilles (Apollod., *Epit.* 3, 33).
- 6) **Sidai** (αἱ Σίδαι), a territory in the Southern Boeotia near Attica’s border (Ath. XIV 560), called after the pomegranates growing there in great abundance, BENSELER (1884: 1383); MALINOWSKI (2007: 283).
- 7) **Sibda** (ἡ Σίβδα), a town in Caria (St.Byz.). BENSELER (1884: 1379) gives correctly the meaning ‘Granaten’, referring to the Hesychian gloss: σίβδαι · ροιαῖ (Hsch., σ-567).
- 8) **Sidake** (ἡ Σιδάκη), a town in Lycia (St.Byz.). The relation to the (Ionic Greek) lexeme σίδη f. ‘pomegranate’ is suggested by BENSELER (1884: 1383).
- 9) **Sidele** (ἡ Σιδήλη), a town in Ionia (Hecataeus of Miletus in St.Byz.).
- 10) **Sidene** (ἡ Σιδήνη), a town in Lycia (Xanthos in St.Byz.).
- 11) **Sidene**, a town in Troas upon the river Granikos (Str. XIII).
- 12) **Sidene**, a town in Pontus, probably identical with Side (4).
- 13) **Sidenos** (ό Σιδηνός), a river in Pontus near the town Side/Sidene.
- 14) **Sidous** (Σιδοῦς), a village between Korinthos and Megara (St.Byz.).
- 15) **Sidous** (Σιδοῦς), a village in Ionia near Klazomenai (St.Byz.).
- 16) **Sidous** (Σιδοῦς), a village in Ionia near Erythraea (St.Byz.).
- 17) **Sidous** (Σιδοῦς), a place in Pamphylia (St.Byz.).

² This list was made on the basis of Benseler’s lexicon, BENSELER (1884: 1379–1383), and entries in WISSOWA (1923: 2208–2210), s.v. **Side**.

18) Sidousa (Σίδουσα), a town in Ionia (Hecataeus of Miletus in St.Byz.), perhaps identical with Sidous 15.

It cannot be excluded that the same botanic motivation ('pomegranate tree') appears in the following place names located in Asia Minor:

19) Sidyma (τὰ Σίδυμα), a town in Lycia (Alexander in St.Byz.).

20) Singua (ή Σίγγυνα), a town in Pamphylia (St.Byz.). The name in question seems to refer to the Pamphylian town Side. Is it a native (Sidetic?) name of the town Side?

21) Sinda (ή Σίνδα), a town in Pisidia (Str. XII; XIII).

22) Sindia (ή Σινδία), a town in Lycia (Hecataeus in St.Byz.).

Albert Carnoy suggests an Anatolian origin of the Greek appellatives for 'pomegranate' on the basis of numerous place names located in Caria, Troad, Pontus, Ionia and Pamphylia. He says as follows:

"Le **grenadier** (σίδη, σίβδη) porte un nom d'origine anatolienne et, de fait, il apparaît dans un nom de ville carien: Σίδυμα et dans Σιδήνη en Troade, Σίδη en Pamphylie et Σιδηνός rivière du Pont, mais il existe aussi dans des collectives de la Grèce: Σιδοῦς, fortin sur l'île de Corinthe et endroit près de Clazomène, Σιδοῦσσα, fortin près d'Erythrée, Σιδήλη ville d'Ionie", CARNOY (1959a: 226).

It is worth emphasizing that the place-names Σιδοῦς (< PGk. *Σιδό-φεντ-ς) and Σιδουσα, earlier Σιδοῦσσα (< *Σιδόφεσσα < PGk. *Σιδό-φεντια) located in Continental Greece seem to represent a purely Hellenic creation, so e.g. HEUBECK (1960: 6); CARNOY (1961: 193), containing a substrate element in the root. ОТКУПЩИКОВ (1975: 272 = 2001: 159) emphasizes that the Ancient Greek place names on -εσσα were inseparably connected with the Pre-Greek substrate ("древнегреческие топонимы на -εσσа были неразрывно связаны с догреческим субстратом"). He demonstrates clearly that the Lydian town Σιδοῦσσα, whose name is motivated by the Greek appellation σίδη f. 'pomegranate', cannot be separated from other toponyms with the Pre-Greek suffixes -ηνā, -ηλā and -υμα, e.g. PN Σιδήνη (Lycia, Troas), Σιδήλη (Ionia) and Σιδυμα (Lycia), ОТКУПЩИКОВ (1975: 274–277 = 2001: 160–163; 2001a: 291).

It is obvious that the substrate place names denoting 'pomegranate (tree and fruit)' are distributed in Asia Minor, as well as in the Continental Greece.

6. A survey of opinions on the origin of Greek σίδη.

WHARTON (1890: 113) connects Gk. σίδη (also σίβδα) f. ‘pomegranate, water-lily’ with NPers. *sīb* ‘apple’. It is unclear whether – according to Wharton – the Greek term is etymologically related to the Persian term or it is borrowed from the Persian language. It should be added that JUSTI (1880: 18) derives the Iranian terms (NPers. *seb*, *sev* ‘apple’, Kurd. *sev*, *siv* ‘id.’) as borrowings from Hindi *seb* ‘apple’ (< Sanskrit *sēvi-* n. ‘fruit of Zizyphus jujuba, apple’³).

PRELLWITZ (1892: 284) believes that Gk. σίβδη, σίδη f. ‘pomegranate’ represents a Carian borrowing. He compares it with Alb. *shegë* f. ‘pomegranate’ and NPers. *sēb*, *sēv* ‘apfel’. The Carian origin of the Greek lexical bunch was also suggested by HEHN (1902: 244).

MEYER (1902: 24) claims the non-Greek origin of the σίδη/σίβδη lexical bunch (“Ohne Zweifel ungriechischer Ursprungs”).

In his work on the earliest inhabitants of Greece HUBER (1921: 22) gives a short reference to the pomegranate trees (and fruits), whose names have been borrowed by the Greek newcomers from a non-Greek substrate. He indicates also a number of Pre-Greek place names derived from the term σίδη.

In his earlier works CARNOY (1955: 62; 1955a) explained σίδη as a Pelasgian word, deriving it from the Indo-European root **sweid-* ‘to sweat’. HESTER (1965: 364) believes that the Pelasgian origin appears to be doubtful for phonological reasons (“no change of *d > τ”). That is why Hester prefers an “Asiatic” origin of σίδη.

In his etymological dictionary of the Greek plant names CARNOY (1959: 243) expresses a different hypothesis than an alleged Pelasgian etymology. According to his new opinion, the Greek term σίδη/σίβδη seems to represent a loanword taken from an oriental Indo-European source (cf. NPers. *sēb*). He tries to derive the attested Greek forms from the Indo-European archetype **seip-dhē*, explaining that “[l]a finale *dhē* se trouve dans divers mots indo-européens. Quant à la racine *seip*, elle signifie : « découler, suinter », ce qui convient bien à la grenade dont on suce le jus”, CARNOY

³ An opposite direction of borrowing is suggested by TURNER (1966: 786), who derives Sanskrit *sēvi-*, *sēva-*, *sēvita-* n. ‘fruit of Zizyphus jujube, apple’ (lex.) from an Iranian source. In his opinion, most Modern Indic terms (including Panjabi *seb*, Hindi *seb* m., Oriya *seba*, Gujarati *seb*, *sep* n. ‘apple’) should be treated as direct loanwords from Persian *sēb* ‘apple’. Only Panjabi *se* f. ‘apple’, dial. ‘fruit of Prosopis spicifera’ (also *seū ber* m. ‘a grafted Zizyphus jujuba’, *seun* f. ‘id.’), Oriya *seu*, *seo* ‘apple’, Nepali *seu*, *syau* ‘apple’ and Marathi *śev* f. ‘name of a fruit tree’, n. ‘its fruit’, may represent straightforward reflexes of Skt. *sevi-*, TURNER (1966: 786).

(1959: 243). As regards the Aeolic form *ξίμβα*, he explains it as a nasalized form: “C'est une variante nasalisée de *sibdē* empruntée à un autre idiome du proche orient”, CARNOY (1959: 273). In a different work the Belgian scholar suggests an Anatolian origin of the Greek appellatives for ‘pomegranate’ on the basis of numerous place names located in Caria, Troas, Pontus, Ionia and Pamphylia, CARNOY (1959a: 226).

BRANDENSTEIN (1958: 86–87) analyses the place name Side in Pamphylia, as well as the related Greek appellatives for ‘pomegranate’. He concludes that all the forms attested in Ancient Greek can be derived from the non-Greek archetype *śintwa. NEUMANN (1962: 210–211) prefers to derive Gk. σίδη and σίβδη from the protoform *sibdā. They do not take into account a possible Pamphylian (Sidetic?) variant Σίγγνα (= Gk. Ionic Σίδη).

DRESSLER (1965: 186) discusses the Pamphylian change of the intervocalic dental stop δ [d] to ρ [r], indicating that the Pamphylian place name Σίδη contained originally a consonantal cluster and not one intervocalic phoneme [d]. He hesitates, however, whether the Greek term σίβδη, σίδη f. ‘pomegranate’ derives from *sibd- (as suggested by NEUMANN 1962) or *śintw- (as BRANDENSTEIN (1958) claimed on the basis of the Aeolic gloss in the Hesychian lexicon: ξίμβαι · ροιαί. Αιολεῖς).

FRISK (1962: 702–703) believes that the Greek word in question, as well as Alb. *shegē* ‘Granatapfel’, should be treated as a borrowing of unknown origin (“Unerklärtes Fremdwort”).

The substratal origin of the Greek term for ‘pomegranate’ is claimed by FURNÉE (1972: 286), who indicates a number of Pre-Greek features, attested in the preserved forms denoting ‘pomegranate’:

- (1) A nasalization (“Nasalierung”), e.g. ξίμβα, ξίμβρα versus σίβδα, σίδη.
- (2) An alternation between [ks] und [s] (“Wechsel zwischen ξ und σ”), e.g. ξίμβα, ξίμβρα versus σίβδα, σίδη, cf. also BEEKES (2010: XXVI).
- (3) A secondary dental stop (“der sekundäre Dental”), e.g. σίβδα, σίδη.
- (4) A development of δ into ρ (“der Lautwandel von δ [...] zu ρ”), e.g. σίβδα versus ξίμβρα, cf. also BEEKES (2010: XXVIII).
- (5) An epenthesis of λ (“die Variante [...] mit epenthetischen λ”), e.g. σίλβα.

In his etymological dictionary of the Greek language CHANTRAYNE (1974: 766) treats Aeolic ξίμβαι f. pl. ‘pomegranates’ as word of obscure origin, perhaps a loan word (“obscure, p.-ê. mot d'emprunt”). Having accepted Chantraine’s opinion, SZEMERÉNYI (1977: 5) indicates that the Aeolic appellative ξίμβα f. ‘pomegranate’ cannot be separated from the pair σίδη = σίβδη f. ‘id.’. He gives a reference to BRANDENSTEIN’s (1958: 86–87) and

DRESSLER's (1965: 186) papers. After Szemerényi the same opinion is repeated by PAPANASTASSIOU (1994: 36), s.v. ξίμβαι.

CHANTRAYE (1977: 1002) explains the σίδη family of words as a loanword ("Emprunt"), adding that the observed variation -βδ-, -δ-, -λβ- points clearly to a non-Greek source. He registers Ancient Greek lexical data, adding a valuable form, namely ψύδιον 'pomegranate peel' (Alexander Trallianus) = σίδιον n. 'id.', usually in pl. σίδια, σιβδια and σιλβια 'pomegranate peels'. The initial alternation ψ- [ps-] vs. σ- [s-] seems to demonstrate a sixth (6) feature typical of Pre-Greek substrate. Also ОТКУПЩИКОВ (1988: 127) emphasizes that the Carian place name Σιβδα (= ap. σιβδα 'pomegranate') contains the cluster -βδ-, which is foreign in the Greek language.

Under the heading σίδη BEEKES (2010: 1329) mentions the related by-forms σιβδη and (Aeolian) ξίμβα, as well as to Alb. *shegë* f. 'pomegranate'. After Brandenstein and Furnée he reconstructs the protoform *σιφδ- for σιβδη and strongly argues that "the group is Pre-Greek". On the other hand, Beekes treats the Hesychian gloss ρίμβαι · ροιαὶ μεγάλαι. ἄμεινον δὲ διὰ τοῦ Ξ ξίμβαι (Hsch., p-324) as "unclear".

7. The analysis of a Pre-Greek family of words.

In his controversial book on the Pre-Greek substrate FURNÉE (1972) demonstrated numerous Pre-Greek features which appear in abundance in the analyzed family of the Greek words denoting 'pomegranate'. His observations and conclusions were also supported by other researchers, including Chantraine, Otkupshchikov and BEEKES (2010: XIII–XLII).

The analysis of the preserved evidence let us to reach the following conclusions:

1. The Modern Greek lexical evidence demonstrates clearly that most Ancient Greek forms can be hardly treated as fictitious.
2. The Albanian term for 'pomegranate', *shegë*, as well as the Hesychian gloss κυσήγη · ροιά (Hsch., κ-4730), cannot be separated from the attested Ancient Greek forms: (Ionic) σίδη, (Boetian) σίδᾶ, (Cyrenaean Doric) σι-βδᾶ, (Aeolian) ξίμβα and numerous glosses registered in the Hesychian lexicon, e.g. σιλβαι · ροιαί (Hsch., σ-634). The Albanian form is considered to be a loanword like Greek σίδη, BOISACQ (1950: 864).
3. The Albanian phoneme -g- and the Greek consonant -β- (preserved in most attested forms) seem to document a labiovelar voiced stop **g^w*. This labiovelar stop was accompanied (usually preceded⁴) by an undefined

⁴ The attested cluster -βδ- may represent the original consonantal group -δβ- (< *-dg^w-).

substrate phoneme [C], which was identified by the Greeks as a dental [D], liquid [L] or nasal [N].

4. The Aeolian Greek forms denoting ‘great pomegranate’ seem to contain an augmentative prefix **kʷ(u)-*, which appears to be recognized in the form κυστήγη and Alb. *shegē* f. ‘pomegranate’.

5. All these variants indicate that the discussed term for ‘pomegranate’ cannot be a purely Hellenic word. Modifications in the middle consonant may suggest that the prototype is a Pre-Greek appellative containing an original sound [C], which was difficult to identify to the Greeks. It was adapted as a voiced dental stop [D] or a liquid [L] or a nasal [N] in Ancient Greek.

6. All the attested Ancient and Modern Greek forms can be reconstructed as **siCgʷā* f. ‘pomegranate’ or **kʷ(u)-siCgʷā* f. ‘great pomegranate’.

7. Different reflexes of [C] explain attested forms and derivatives, e.g.

C = dental **siDgʷā* > **sibdā* > *sibdā* > *sidā* → **sibdion, sidion, psidion;**

C = liquid **siLgʷā* > *silbā* → **silbion;**

C = nasal **kʷu-siNgʷā* > **kʷsimbā* > *ksimbā* > **rhimbā**.

Our analysis of the attested Ancient and Modern Greek forms can be summarized as follows:

Table 1: Pomegranate in Greek

Pre-Greek Variants	<i>*siDgʷā</i> D = a dental consonant	<i>*siLgʷā</i> L = a labial consonant	<i>*siNgʷā</i> N = a nasal consonant
Greek Forms	<i>*sibdā</i> , secondarily <i>*sidā</i> (< <i>*sibdā</i> < PGk. <i>*sidgʷā</i>)	<i>*silbā</i> (< PGk. <i>*silgʷā</i>)	<i>*kʷsimbā</i> (< PGk. <i>*[kʷ]singʷā</i>)
Attestations in Greek dialects	Ionic and Attic σίδη f., dial. σιβδη ‘a pomegranate tree and fruit’, also ‘a water plant’; Doric (Cyrenaean) σιβδᾶ f. ‘pomegranate’ (CALL., <i>Dian.</i> 28); Boeotian σιδᾶ f. ‘pomegranate’, also ‘a water plant, probably water-lilly, <i>Nymphaea alba</i> L.’	Pamphylian (?) σιλβᾶ f.; East Doric (?) σιλβᾶ f.;	Aeolic ξίμβα f. ‘a (great) pomegranate’; dial. (?) ρίμβα f. ‘id.’
Hesychian glosses (basic words)	σιβδαι · ροιαί (Hsch., σ-567); σιδαι · ροιαί (Hsch., σ-590)	σιλβαι · ροιαί (Hsch., σ-634)	ξίμβαι · ροιαί. Αιολεῖς (Hsch., ξ-68); ρίμβαι · ροιαί μεγάλαι. ἄμεινον δὲ διὰ τοῦ Ξ ξίμβαι (Hsch., ρ-324)

A similar development is attested in Gk. *τίπτε* ‘what, why’ < **τίτπε* < ie. **kʷid-pe*, cf. Lat. *quippe*.

Pre-Greek Variants	*siDgʷā D = a dental consonant	*siLgʷā L = a labial consonant	*siNgʷā N = a nasal consonant
Hesychian glosses (derivatives)	σίβδια · σίδια (Hsch., σ-567) ‘pomegranate peels’, also σίδια · τὰ τῶν ροιῶν λέπυρα. σίδαι γάρ αἱ ροιαί. τίθεται δὲ καὶ ἐπὶ πάντων χλωρῶν (Hsch., σ-598)	σιλβια · σίδια (Hsch., σ-635) ‘pomegranate peels’	
Modern Greek forms	Pontic σίδη, Cappadocian σίτη (in Sinasos), το σίδι (in Pharsa); Kerkyrian το σίδι ‘Weide, Weidenbaum’	Pontic (in Chaldia) σιλβᾶ ‘eine Pflanze mit roten Früchten an der Blättern’; Samian το σιλβί ‘Pap-pel’; Rhodian (PN) οι Σίρβες; Chian (PN) η Σίρβα	
Foreign forms	LW in the Italian dialects: Salent. <i>sida</i> , <i>sita</i> , <i>sèta</i> ; Tarentian <i>sèta</i> ; Bar. <i>sétə</i> , <i>saitə</i> , <i>séitə</i> f. ‘melagrana’, Brind. <i>setúddu</i> ‘fiore di melagrano’ < West Doric *σίδū f. ‘pomegranate’		Bessan (?) κυσήγη · ροιά (Hsch., κ-4730); Albanian <i>shegë</i> f. ‘pomegranate’ < *siCgā Cf. also Pamphylian place name Σίγγυα (= Gk. Σιδη)
